6. PUBLIC HEARINGS:
  - a) A continued advertised public hearing to review and consider Final Environmental Impact Report (FEIR) No. 13 prepared for the 238-acre Hollywood Park Redevelopment Project located at 1050 South Prairie Avenue (legally described as APN No. 4025-011-028 and APN No. 4025-011-029) and to make a recommendation to the City Council regarding certification of the FEIR report (including appendices, Mitigation Monitoring and Reporting Program), and California Environmental Quality Act (CEQA) findings and a statement of overriding considerations. The project applicant is Hollywood Park Land Company, LLC. The FEIR was prepared to assess the construction and operational impacts of a Specific Plan for a project that would include the demolition of the Hollywood Park racetrack, and the new construction of approximately 2,995 dwelling units, 620,000 square feet of retail space, 75,000 square feet of office/commercial space, and 10,000 square feet of community serving uses for the Home Owners' Association (HOA). The project would also allow for a 300-room hotel including 20,000 square feet of related meeting space. The Pavilion/ Casino would be maintained at its present location on the project site. A four-acre site is proposed for civic uses, which could include uses such as a school, library, community center, etc., subject to a City determination. Approximately 25 acres would be designated for recreation/open space for the development, including 2.5 acres of recreational amenities for residents of the subject site. The proposed residential units would include single family homes, townhomes, stacked flats, condominium units and mixed-use housing developed above ground floor retail or office uses in commercial center areas. At least 90 percent of the residential units would be for-sale (i.e., ownership). The Final EIR evaluates the potential impact of the proposed project on the environment. Mitigation measures are presented to reduce potentially significant impacts to less-than-significant levels for all environmental categories as well as identifying those categories that may have significant impacts, like air quality and construction. The property is currently zoned C-R (Commercial and Recreation). The Planning

Commission will be requested to make a recommendation to the City Council regarding certification of the FEIR. This item was continued from the May 6, 2009 Planning Commission meeting.
