DATE: March 29, 2023
TO: Mayor and Council Members
FROM: City Manager’s Office

RECOMMENDATION:
It is recommended that the Mayor and Council Members take the following actions:

1. Approve an agreement with Buffalo Computer Graphics (BCG) for the acquisition of Crisis Management Software in a total amount not to exceed $67,371.69 (includes a 10% contingency in the amount of $6,124.70) (General Fund); and
2. Adopt a resolution amending the Fiscal Year 2022-2023 Budget to fund an agreement for Crisis Management Software.

BACKGROUND:
In 2018, the State Homeland Security Grant Program (SHSGP) allocated funds for the development of a comprehensive crisis management software platform aimed at cities within the Los Angeles Operational Area. The City of El Segundo Fire Department has served as the fiduciary agent for this project, overseeing the creation of an Emergency Operations Center (EOC) crisis management operating platform for all participating cities.

The City of Inglewood has actively contributed to the project governance group, providing assistance throughout the development process and volunteering as one of the beta test sites for the software platform. This participation was particularly beneficial to the City of Inglewood as the host for Super Bowl. The software became an integral component of the City’s Super Bowl Public Safety Response Plan, and served as the primary tool for multi-agency coordination and situational awareness. Today, this platform is essential for the effective management of large-scale events, disaster preparedness, and potential recovery efforts.

Due to a significant staff turnover at the El Segundo Fire Department in late 2021, the City of Inglewood has agreed to assume the role of grant fiduciary. Grant funding is channeled to the local area via a Sub-Recipient Agreement with Los Angeles County, which covers expenses associated with a virtual emergency operations center.
DISCUSSION:
In its capacity as the fiduciary grant agent, the City of Inglewood will collaborate with the County of Los Angeles to maintain the platform and actively participate in the governance group. The City of Inglewood will benefit from full access to the software platform without incurring any additional charges or administrative expenses while managing the project. Any such expenses will be billed to the grant.

As the current BCG contract with El Segundo is set to expire on March 31, 2023, a two month bridge agreement is essential to maintain platform operations during the contract gap period from April 1, 2023 to May 31, 2023. As a result of this bridge contract, Los Angeles County Grant Staff will assist the City of Inglewood in reimbursement of the contract cost in the amount of $61,246.99, as well as qualifying prior Super Bowl expenses in the amount of $136,888.52. The total reimbursement to the City of Inglewood is $198,135.51.

Beginning June 1, 2023, the City of Inglewood will serve as the fiduciary for a new approved State Homeland Security Grant. This grant will finance the continued operation of the BCG Crisis Management Platform, encompassing technical support and training services for an additional two years.

Buffalo Computer Graphics is only authorized to provide services or products to the City of Inglewood once the City Attorney receives and approves the insurance.

FINANCIAL/FUNDING ISSUES AND SOURCES:
Upon City Council approval of the attached amendment, sufficient funds in the total amount of 67,371.69, will be available in the Fiscal Year 2022-2023 Budget under Account Code No. 001.020.2020.44820.00 (General Fund-Administration-Emergency Services-Contract Services) for the Crisis Management Software.

The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements required by these specifications, at any time.

Subcontractors
Consultant shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that the City is an additional insured on insurance required from subcontractors.

Special Risks or Circumstances
The City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

9. Litigation: Venue, Applicable Law and Personal Jurisdiction. This Agreement shall be interpreted, construed and governed according to the laws of the State of California. Custom Development Terms
Custom software will be designed, developed, tested and ready for installation on LAMACS’s DLAN system over the course of the calendar year. Once completed, it can be scheduled for installation and configuration at a date/time of LAMACS’s choosing.

All development built into the DLAN product is owned by BCG and can be distributed to other DLAN customers as BCG sees fit. BCG retains all ownership rights to the DLAN Incident Management Product and all code that is developed within DLAN as a part of this project. Following development, testing, and installation in LAMACS’s DLAN environment, LAMACS will retain a license to these new features for the duration of their contract or until BCG and LAMACS mutually agree that said features are no longer necessary within the software to support the LAMACS’s needs.

Maintenance & Support Terms
The annual maintenance & support term will begin on 4/1/2022.

For government customers in the United States, an “Activation” is defined as a formal local, state, or federal declaration of emergency. In order to receive 24/7 activation support, the customer must notify BCG of the declaration and be able to provide a copy of the declaration upon request.

For Activation support, a support case is defined as a single support issue and the reasonable efforts needed to resolve it. A single support issue is a problem that can’t be broken down into subordinate problems. If it can be broken down into subordinate problems, each subordinate problem shall be considered a separate support case. A case may require multiple contacts and offline research to achieve final resolution. A BCG support staff member will agree on the definition of the problem with you when you raise the support case. The case will be closed after the support professional has delivered one or more suggested solutions to you. If the support professional is unable to deliver a solution, you’ll be notified and the case will be closed as unresolved. Although our support staff will make best efforts to resolve your issue, BCG cannot guarantee to resolve all issues, due to the diversity of our customers’ computer configurations.

Custom BCG Services include:
- Form Building
- Client Configuration
- Server Migrations/Configuration
- Security Scans
- Data Imports
- Data Feed Integration
- Individualized Web Trainings
Other services may also be included at the discretion of BCG. Customers will be given a time estimate for requested services, any hours above those included in your support contract will be billed separately.

Requests for system modification to enhance DLAN capabilities are not directly covered by your maintenance & support contract and will be billed on a times and material basis. If the BCG team feels that a requested customization will be beneficial to other customers, it may be developed at a significantly reduced cost or at no cost and then provided to all customers with a current maintenance & support package.

For Platinum and Platinum Plus customers, the full day (8 hours) of on-site support must be held within normal business hours and includes the cost of travel and lodging.

Unless specified, On-site support is not covered by DLAN’s maintenance and support packages. All on-site support will be billed on a time and materials basis.

Any customer without a current maintenance and support package will be billed at an hourly rate for all BCG support, including phone and email support.

All documentation will be provided in American English unless otherwise specified.

Supporting Hardware and Software
Client PC and Mobile Devices
Since DLAN is an internet-based solution, it can be accessed from most operating systems (e.g. Apple iOS, Microsoft Windows, Android) and mobile devices (e.g. Apple iOS Devices and Android Devices) as long as a modern browser is installed. The latest versions of Chrome, Firefox, Safari, Android Mobile, Internet Explorer, and Edge are all supported. BCG reserves the right to change supported browsers/devices to reflect changes in technology.

Client PCs do not require DLAN software to be loaded on them; all system software resides on the data center server. Client PCs do not have to be dedicated to DLAN, and may run any other desired applications. Any application licensing required to access files that user upload to DLAN is the responsibility of the customer (e.g. Adobe Acrobat, MS Word, MS Excel, MS PowerPoint).

On Site Training Requirements
For customers that have included onsite training in their purchase, customer must provide an adequate facility for training personnel for the use of DLAN. This includes a computer for each participant that meets BCG’s criteria for client devices as outlined above. Additionally, the customer must provide a stable high speed (broadband) Internet access connection with sufficient bandwidth and coverage to support simultaneous access by all students and instructors. A large format TV or projector and video cable is required to assist the instructor in displaying examples and presentations. BCG instructors will typically bring their own laptop but if the training facility has specific security or network requirements, the customer will be responsible for providing an instructor PC that functions at their facility.

GIS Specifications
GIS Premium requires a connection to ESRI’s ArcGIS Server or an ArcGIS Online account in order to serve up basemaps, provide geocoding & geoprocessing, view data overlay services (layers), use/embed ESRI’s operational dashboards into Status Boards, and provide geometry services. If your agency already has ArcGIS
licensing, DLAN can consume and leverage your existing services at no additional cost. DLAN’s GIS toolset is compatible with ESRI’s ArcGIS Server (versions 10.1 or higher at the workgroup and enterprise levels) or ArcGIS Online.

Alternatively, if your agency does not have access to an ArcGIS Server or ArcGIS online, BCG can provide you with access to ArcGIS services. Please talk to your BCG representative for details. Access to BCG’s ArcGIS server services includes basic ArcGIS online map services (basemaps, map services, feature services, geocoding services, geometry services, and geoprocessing services). If your agency would like to manage your own custom GIS layers, you will need your own ArcGIS Server or ArcGIS Online account. Additional licensing for custom ArcGIS services is not provided by BCG and is the responsibility of the customer.

External services available within DLAN’s GIS module (e.g. AERIS maps, Microsoft Bing Maps, Google driving directions, and ESRI basemaps) are hosted by third parties that are not covered by the BCG Master Services Agreement (MSA) or Service-Level Agreement (SLA). Availability of those services is dependent upon network congestion, server availability, and other conditions present at these third parties and are not guaranteed as part of any uptime guarantees outlined in the SLA. BCG will make every effort possible to resolve issues with 3rd parties or to suggest alternatives to those services.
