Inglewood Police Department Releases Free Mobile App to Connect with Members of the Community

The Inglewood Police Department has released a free mobile app to connect with members of the public through their smartphones and tablets.

The new app allows Inglewood PD to quickly disseminate emergency alerts, and post news about missing persons, traffic delays, and weekly crime reports. In the event of an emergency, app users receive instant notification via their mobile devices.

Citizens can easily send comments and crime tips — anonymously if they wish — and place calls to Inglewood PD with the touch of a button. They can notify the department about suspicious activity and easily send images such as graffiti through the app.

Anyone using Android, Windows or Apple platforms can download the app simply by going to the app store and searching for the Inglewood Police Department app.

“The app provides an easy-to-use method for two-way communication between our department and community members,” said Chief Mark Fronterotta “It’s a valuable tool for keeping Inglewood safe. Chief Fronterotta explained that the app also allows Inglewood Police Department to post photos and images, bulletins, a calendar of events, and even conduct community surveys.

The app supports the department’s commitment to engage with the community in a timely manner through all sorts of social media. News that is distributed through the app also can be set to automatically post on the department’s social media accounts and distributed to the news media.

The Inglewood Police Department app is not meant to replace calling 911 for crimes and emergencies in progress. Those experiencing an emergency situation should continue to call 911.

The Inglewood Police Department app was developed under the name USPDhub by LogicTree IT Solutions, Inc. (<http://www.logictreeit.com>) of Citrus Heights, CA.
